## Gas Crises

Question	My Response
1) Why do you think that people ignored Steward Udall's warnings?	
2) How do you think you and your family would get around without a car?	
3) What is happening in this picture? Why? Does it remind you of anything?	
4) Why is gas not a renewable resource?	
5) So where do we go from here? Offer sustainable (we can keep them up!) solutions
