

Diagnostic Activity: Looking at Education and Quality of Life

Minds On: Milling to Music

1) What is the relationship between natural resources and quality of life?

2) How can some countries have so much and some have so little?

Action:

Some countries have limited resources. How can countries and their citizens be affected by natural resources, access to water, drought and exploitation?

Education for All Video:

Jot down some key ideas as you watch the video

Group Work:

Create an anchor chart that explores the relationship between natural resources, quality of life, and education (see planner on back side of sheet).

Education impacts quality of life by:

- lack of education can mean that people are unable to get a well-paying job

-
-

Education impacts natural resources by:

- lack of education can mean that people are unable to use knowledge to fix environmental issues

-
-

Natural Resources impact education and quality of life by:

• lack of fresh water due to drought can cause children to have to walk for miles each day to fetch water instead of school

-
-

Education

Quality of Life

Quality of Life impacts education by:

• poverty can mean children have to go to work young, instead of school

-
-
