## GeoGuessR : Solving the Location Mystery

**Learning Goal:** We are learning to think critically about the ways in which physical features define a location.

**Remember:** a **physical feature** is a natural (not man-made) feature of an environment that helps to define it, like soil, mountains, or climate.

### Procedure

- 1) In partners, use your computer to go to the GeoGuessR website (<https://geoguessr.com>). Each partner will record on their own sheet
- 2) You will be given five locations. Use physical features to make a justifiable guess as to the location, and record your ideas below.
- 3) You can use the arrows to move around the location.

Location #	Physical Feature Clues	Guess	Correct Location/ Distance Away
1			
2			
3			
4			
5			

Total Score: \_\_\_\_\_
