

Researcher's Name: _____

Date: _____

Geography Unit A2 Lesson 7

From: Ms. Kukurudza, UN Environmental Rep (*in alternate universe)
Regarding: Professional Advice Needed

To: Gr. 8 Class

Date: November 7, 2014

ATTENTION: URGENT

In Bangladesh, rising water levels and the tumultuous climate are displacing people by the thousands; a projected 20% of Bangladesh is expected to be covered in water within twenty years. For a country that is one of the densest populated state on the planet, this figure has disastrous consequences for a population that has limited access to fresh water, food, and medicine.

Part One: Video (/6)

Problem I See	Impact on Humans/ Environment

Research Planner

Part Two:

As a researcher, you will answer the research question below and then create your own research question.

Success Criteria:

- I make my thinking clear by providing evidence **(justify your response)**
- I use geography concepts and vocabulary **(sustainability, climate change, technology, etc.)**
- I use critical thinking and consider the economy (\$), people, and the environment

	Research Question		My Research Question
<p>Research Question</p> <p>The first question is provided for you to answer. The second you will create</p>	<p>What is one potential solution for the flooding in Bangladesh?</p>		<p>One research question I have before I put my solution into action is:</p>
<p>My Solution</p> <p>Be detailed and use geography language.</p> <p style="text-align: center;">/5</p>			<p style="text-align: center;">/3</p>
<p>Key Ideas/ Facts That Support My Thinking</p> <p>Think about things we have discussed this unit about technology, sustainability and crisis management.</p> <p style="text-align: center;">/5</p>			<p>One way I could answer this question is:</p> <p style="text-align: center;">/3</p>
